SUMMARY

Full-Stack & Mobile Engineer with 3+ years of professional experience architecting robust web applications and shipping production cross-platform mobile apps (React Native/Expo) to the Apple App Store and Google Play. Deep expertise across TypeScript, React, Next.js, Node.js, and multi-tenant SaaS architectures, alongside hands-on experience owning full release cycles (EAS), secure authentication, payment SDKs (Stripe, In-App Purchases, Hubtel), and AI integrations (Google Gemini API). Proven ability to audit legacy codebases, implement stringent CI/CD quality gates, and deliver resilient, high-performance software across fintech, e-commerce, and educational platforms.

EXPERIENCE

Full-Stack & Mobile Engineer | Cognize Corporation | Nov 2025 – Present

- Build and maintain two production cross-platform mobile apps (Bestrator and Tenscit) using React Native and Expo, managing end-to-end release pipelines via EAS Build, Submit, and store deployment.
- Architected centralized authentication, JWT session management, and granular RBAC protocols across web and mobile platforms to enforce rigorous access control and quota management.
- Integrated multi-platform subscription systems combining Stripe and iOS In-App Purchases with backend receipt verification and offline-first data persistence.
- Developed comprehensive end-to-end testing suites using Jest and React Testing Library, enforcing strict TypeScript type safety and code quality across 50+ components per app.

Lead Mobile & Full-Stack Engineer (Freelance) | Self-Employed | 2023 – 2025

- Functioned as primary engineer for multiple client applications across fintech, e-commerce, and ride-hailing domains, deploying apps to both the Apple App Store and Google Play.
- Architected multi-tenant security layers using Role-Based Access Control (RBAC), third-party OAuth integrations, token refresh cycles, and KYC/identity verification workflows.
- Developed two-sided marketplace applications with real-time driver/rider location tracking via WebSockets, APNs/FCM push notifications, and Stripe payment integration with idempotent webhooks.
- Audited legacy codebases, remediated security vulnerabilities, and implemented CI/CD quality gates via GitHub Actions with linting, type-checking, and automated testing.

Frontend Developer (Mobile & Web) | Bilo Tech Ltd., Tema | Aug – Oct 2024

- Built a React Native food-ordering and menu-browsing mobile application focused on performance, smooth animations, and UX optimization.
- Integrated the Hubtel payment gateway for secure in-app mobile payments and connected REST APIs for real-time order tracking.
- Implemented map-based features for interactive location selection, delivery tracking, and streamlined checkout flows.

SELECTED PERSONAL PROJECTS

InStuddy – AI-Powered Learning Companion | React Native, Expo, Next.js, Node.js, TypeScript | instuddy.com

- Architected a cross-platform (iOS, Android, Web) educational application on a unified Expo and Next.js SSR codebase with PostgreSQL data management.
- Engineered secure identity lifecycles via Google OAuth 2.0, standardized JWT session persistence, and token refresh mechanisms across protected endpoints.
- Integrated Google Gemini API for prompt engineering, response streaming, and error/rate-limit handling alongside a 40+ modular component architecture validated with Jest testing suites.

TECHNICAL SKILLS

- **Core Web Stack:** React.js, Next.js, Node.js, TypeScript, JavaScript (ES6+), HTML5, CSS3
- **Mobile Frameworks:** React Native, Expo, Expo Router, React Native Reanimated, Kotlin (custom modules)
- **Databases & Backend:** PostgreSQL, MySQL, MongoDB, REST APIs, WebSockets/SSE
- **Release & CI/CD:** EAS (Build/Submit/Update), TestFlight, Google Play Console, GitHub Actions, Vercel, Railway, Render
- **Security, Auth & Payments:** OAuth 2.0, JWT, RBAC, KYC Verification, Stripe, StoreKit, Play Billing, Hubtel, PayStack
- **Testing & AI Integration:** Jest, React Native Testing Library, Sentry, Google Gemini API, Claude Code, Cursor

EDUCATION

University of Cape Coast B.Sc. Computer Science
